Lifesafety Power	Hardware	Power and Data Management//Power Supplies//LifeSafety Power Supplies	The M8 smart power controller communicates with an NL4 or NLX network module and provides eight (8) monitored and controlled voltage outputs accessible from a network or the internet. Optional RS485 connection for remote monitoring by NLX using RSMOD (not included). The M8 provides eight (8) control INPUTS capable of voltage or dry contact activation and eight (8) controlled and monitored OUTPUTS, with each output network programmable for fail-safe, fail-secure, fire alarm over ride, and AC loss over ride for egress lock control. Each output is also programmable to either of two voltages available when used in a dual voltage iSCAN power system. OutSmart dual color LEDs visually indicate voltage levels by output (Green for 12V, Blue for 24V). One output is selectable as a network controllable dry relay output.Each output may also be individually enabled/disabled through a browser interface and the voltage and current of each output may be monitored via network or internet, and trigger points may be set up on each output to generate an alertwhen that output is	M8P-BOXED	Required, but not included/available		Reseller	\$287.00	28.00%	\$208.19
