Lifesafety Power	Hardware	Power and Data Management//Power Supplies//LifeSafety Power Supplies	The FlexPower C4, C8 lock controller modules add either 4 or 8 lock control outputs to a FlexPower power supply and are typically supplied as part of a system or purchased as an expansion piece to an existing system. Each module provides either 4 or 8 access control inputs capable of voltage or dry contact activation. Each module provides either 4 or 8 lock outputs, each one programmable for fail-safe, fail-secure, dry contact, and fire alarm over ride for egress lock control. In dual voltage systems, each lock output is also programmable to either of the two voltages available when used in a FlexPower dual voltage power system. Lock modules incorporate OutSmart technology - color changing output LEDs that visually indicate voltage level (Green for 12V, Blue for 24V). Each output is supervised for voltage and/or blown fuse with the fault reported to the host power supply.	C4P-BOXED	Required, but not included/available		Reseller	\$88.00	28.00%	\$63.84
